

Snow Report

Current Temperature: 12 Forecast High: 2

Last Updated April 14, 2010 at 8:41 PM

Current Conditions:

This time of year we have many who want to try skiing on the hill because of the conditions, and we are asking that all of those wanting info to check in at the ticket office, after all, we do have people here that can give you the info you require for access to the mountain and the area surrounding the hill. Check into the Avalanche.ca website for hazard info about the backcountry and adjacent area. Everyone at Castle would like to express our appreciation to all who visited our ski/ride area this season and look forward to seeing everyone again next season in early December. Once again thank you from all at the CASTLE.

Forecast Conditions:

Please let us know what your thoughts were on the snow reporting we did this winter and also let us know how you think we may improve this reporting site. Thanks, and we look forward to your comments. Thanks DWL!!!
