# AT HOME WITH NATURAL GAS

---

A cleaner, more affordable way  
to warm your community

**ATCO**

# THE BENEFITS OF NATURAL GAS

Natural gas is a safe, convenient and cost-effective heating solution for your home that can save you money while also reducing your environmental impact.

## Clean

Natural gas is a greener energy solution, emitting fewer greenhouse gasses than other fossil fuels.

## Abundant and Affordable

In Alberta, natural gas is abundantly available, making it more affordable than other forms of heating for home and commercial use.

## Safe

Natural gas is light, and dissipates more quickly and efficiently when it burns, making it one of the safest fuels for heating your home.

## Reliable

ATCO has been warming communities in Alberta for more than 100 years and is the province's largest distributor of natural gas. We serve more than 1.1 million customers in nearly 300 communities.

## Versatile

Natural gas can be used to heat your home and fuel appliances such as ranges, dryers, fireplaces, water heaters, barbecues and more.

## HOUSEHOLD BENEFITS OF NATURAL GAS VS. PROPANE

### Safety

At Castle Mountain Resort, ATCO would operate and maintain an underground distribution network of pipelines to deliver natural gas to homes and businesses in the area. In the event of an emergency, we can isolate and cutoff fuel supply from 20km away.

### Cost Savings

On average, a single-family dwelling will see an annual savings of approximately \$474 for switching to natural gas. This is a 41% savings compared to current costs for propane.

### Environmentally Responsible

By switching to natural gas, residents will see a 16% annual reduction of CO2 emissions. That's equivalent to removing 20 passenger cars off the road each year!

### Customer Service

At ATCO, we go above and beyond to ensure our customers receive safe and reliable delivery of natural gas. We are on-call 24/7 to respond to customers – whether it is loss of service, gas odour, appliance safety checks, installations or relighting of natural gas appliances, we will be there for you.

### Reliability

In Alberta, natural gas is readily abundant, and by connecting into ATCO's natural gas system you never have to worry about running out of fuel.
